Check in with security at the main entrance. Make a right at the first cross aisle, pass the cafeteria entrance, and look for the auditorium on your right.

MEET OUR GUEST SPEAKER

SFDXA is pleased to welcome George Zafiropoulos, KJ6VU as our September guest speaker. George is best known as the host of the Ham Radio Workbench Podcast, the bi-weekly deep dive into making DIY electronics, using test equipment, and the technical side of amateur radio. Licensed since 1972, he's also a builder and entrepreneur with a long list of projects to his credit.

George will be covering topics including:

- **PackTenna** – Lightweight wire antennas for portable operating, born out of his search for mountain-ready systems.
- **Sierra Radio Systems** – Shack automation and monitoring hardware, spanning repeater and remote control.
- **iShareRadio** – His newest project with FlexRadio that lets clubs and individuals securely share remote radios.

Whether you're chasing DX, working portable, or automating your shack, there's something here for you. Bring your questions! And Bring a Friend!

FREE RAFFLE -DOOR PRIZES!

5 DOOR PRIZES! You must be present to win

PackTenna PT-101 Mini End-Fed Random Wire Antenna

This compact, lightweight trail-ready portable HF antenna is ideal for POTA, SOTA, camping, backpacking, and travel. The PackTenna Mini Random Wire Antenna combines a 9:1 UNUN, wire winder, and antenna wire in a compact unit that is quick to set up and take down and toss into a backpack. The antenna comes with 29 feet of 26AWG copper clad steel wire with a great "silky" jacket to minimize wire tangle. You can add your own wire to extend to 35.5/41/58, or 71ft. Power Rating: 100W SSB/CW, 50W digital. Tuner and coax with BNC connector required.

Plus, more great prizes:

R&L Electronics \$25 Gift Certificate
W0AEZ \$50 Gift Certificate
Rick TheSignMan \$25 Gift Certificate
Alpha Antenna \$50 Gift Certificate

*You Don't Need to be a
Member of the Club to join*
